☐ The data responses being collected for each death changed in 2005 with the advent of the new, electronic certificates. The Tobacco Use variable's affirmative responses were subdivided into "Yes" or "Probably".

\*\* Population estimates beginning in 2011 are from the U.S. Census Bureau's Population Estimates Program. Populations for 2000 and 2010 are from the U.S. Census. All other population estimates are projections for Douglas County from Woods & Poole Economics.

\*\*\* Beginning in 2005, the total count for the Tobacco Use variable is the sum of "Yes" and "Probably" responses. For a large number of deaths tobacco use is unknown or not reported.
